PREFACE/PRÉFACE

As part of its mandate, the Public Archives of Canada has accumulated many census records relating to the historical development of present-day Canada. Most nineteenth-century census records which have been collected in their original form are located in the Government Archives Division with the records of Statistics Canada, Record Group 31. These records have been microfilmed as a conservation measure and as a means of facilitating their use. In addition, microfilmed copies of census records held in original form in the provincial archives of Ontario, New Brunswick, Nova Scotia and Prince Edward Island, along with some fragmentary returns from other locations have been obtained by the Public Archives of Canada to complete the records already in our possession; these films are in the custody of the Manuscript Division.

In 1963, the Public Archives of Canada published checklists of its census returns on microfilm. In 1978, a Catalogue of Census Returns on Microfilm, 1825-1871 was published. The latter publication, in one volume, included all of the information of the earlier checklists together with additions and corrections. In 1979, the Public Archives of Canada received copies of the 1881 census for distribution. In 1981, a Catalogue of Census Returns on Microfilm, 1666-1881 was produced to include not only the latest acquisition but also some earlier census returns, including those of the first census taken by Jean Talon in 1666. In 1985, the Public Archives of Canada received microfilm copies of the 1891 census for distribution. The present catalogue is a revised and expanded edition, listing census returns available on microfilm from the Public Archives of Canada for the years 1666 to 1891.

I wish to express my appreciation to members of the Public Archives of Canada, particularly Thomas Hillman of the Government Archives Division, for their co-operative effort in the compiling, editing and production of this often requested and most useful catalogue.

Jean-Pierre Wallot
Dominion Archivist

Dans le cadre de leur mandat, les Archives publiques du Canada recueillent de nombreux dossiers sur les recensements. Ces dossiers font état de l'évolution historique du Canada et datent pour la plupart du XIX^{e} siècle. Acquis dans leur forme originale, ils se trouvent à la Division des archives gouvernementales, avec les dossiers de Statistique Canada (groupe d'archives 31). On les a microfilmés afin d'en assurer la conservation et d'en faciliter la consultation. De plus, pour compléter leur collection, les Archives publiques du Canada ont acquis les microfilms de recensements dont les originaux sont conservés aux archives provinciales de l'Ontario, du Nouveau-Brunswick, de la Nouvelle-Écosse et de l'Île-du-Prince-Édouard, ainsi que les microfilms de résultats fragmentaires pour des recensements effectués dans d'autres régions du pays; ces microfilms ont été confiés à la Division des manuscrits.

En 1963, les Archives publiques du Canada publiaient des répertoires des recensements qu'elles possédaient sur microfilm. En 1978, elles faisaient paraître un ouvrage intitulé Catalogue de recensements sur microfilm, 1825-1871, qui rassemble en un seul volume toutes les informations contenues dans les publications antérieures ainsi que des ajouts et des corrections. Puis, l'année suivante, elles recevaient des copies du recensement de 1881 pour fins de diffusion. En 1981 paraissait le Catalogue de recensements sur microfilm, 1666-1881. Ce répertoire portait non seulement sur la dernière acquisition mais sur des recensements antérieurs, dont le premier effectué par Jean Talon en 1666. En 1985 les Archives publiques du Canada recevaient le recensement de 1891 sur microfilm pour fins de diffusion. Ce nouveau catalogue est donc une édition révisée et enrichie qui énumère les recensements réalisés entre 1666 et 1891 qui sont conservés sur microfilm aux Archives publiques du Canada.

Je tiens à remercier les employés des Archives publiques du Canada, notamment Thomas Hillman de la Division des archives gouvernementales, qui ont travaillé à la compilation, à la rédaction et à la production de ce catalogue tant attendu.

Jean-Pierre Wallot
Archiviste fédéral

INTRODUCTION

This catalogue lists census returns on microfilm in the Public Archives of Canada for the present day provinces of Canada. A listing of the census returns available for particular years for each province is included in the Appendix.

Many of the original census returns for New Brunswick, Nova Scotia and Prince Edward Island prior to 1871 and some 1842 and 1848 Ontario census returns are held by the respective provincial archives. As far as can be determined, the census returns for the year 1871 for Prince Edward Island have not survived, while only fragmentary census returns for the 17th and 18th centuries for Newfoundland have been located.

With the exception of the census for 1861, extensive information on the taking of any particular census can be found in the introduction to each volume of the published census reports, 1851 to date. For the census of 1861, the findings were published but no introductory material was provided. The published reports are available at most Canadian libraries or through interlibrary loan.

Enumeration Districts

For the purpose of census enumeration, the provinces were divided into census districts, and those districts in turn were divided into sub-districts. Census districts, with a few exceptions, corresponded with electoral districts. As a general rule, census districts were synonymous with cities and counties, sub-districts with towns, townships and city wards. Villages, small towns, parishes and seigneuries were generally enumerated as part of the township in which they were located. However, users should be aware that census district and county boundaries did not always coincide. For example, Loughborough Township (Frontenac County, Ontario) is found in Frontenac census district for 1851 and 1861, but is attached to Addington census district for 1871, 1881, and 1891. In addition, districts were often reduced in size or disappeared completely with the creation of new districts between one census and the next. Furthermore, place names may have changed. Thus, Ottawa is found readily for 1861-1891, but was listed as part of Carleton County in 1842 and was known as Bytown in 1851. Users of this catalogue should therefore be aware of the local history and any name changes to the locality. Consulting a good historical atlas or an historical map collection in conjunction with their research is advisable.

La liste qui suit présente les recensements sur microfilm que possèdent les Archives publiques du Canada pour chacune des provinces actuelles. En annexe, on trouvera d'ailleurs une classification de ces recensements, selon les provinces.

Nombre d'originaux des recensements du Nouveau-Brunswick, de la Nouvelle-Écosse et de l'Île-du-Prince-Édouard, pour la période antérieure à 1871, et une partie des recensements de l'Ontario, en 1842 et en 1848, sont conservés par les archives de ces provinces. Selon toute indication, les résultats du recensement de 1871 à l'Île-du-Prince-Édouard n'existent plus, et, en ce qui concerne Terre-Neuve, nous n'avons retrouvé que des résultats fragmentaires pour les XVII^{e} et XVIII^{e} siècles.

Chaque volume des rapports publiés des recensements paru depuis 1851, sauf celui de 1861, comporte une introduction renfermant des renseignements sur le dénombrement. Le rapport de 1861 a été publié mais sans renseignements préliminaires. On peut se procurer ces volumes dans la plupart des bibliothèques canadiennes et par l'intermédiaire du prêt entre bibliothèques.

Districts de dénombrement

Pour les besoins du recensement, les provinces étaient divisées en districts et en sous-districts, les districts de dénombrement correspondant, à de rares exceptions près, aux circonscriptions électorales. En général, les cités et les comtés étaient considérés comme districts, tandis que les villes, les cantons et les quartiers d'une ville étaient des sous-districts. Quant aux villages, aux petites villes, aux paroisses et aux seigneuries, ils étaient généralement recensés à l'intérieur du canton dont ils faisaient partie. Toutefois, un district de dénombrement ne correspondait pas toujours au même comté; par exemple, Loughborough Township (comté de Frontenac en Ontario) est situé dans le district de Frontenac pour les recensements de 1851 et 1861, mais fait partie du district d'Addington pour ceux de 1871, 1881 et 1891. De plus, l'étendue d'un district pouvait diminuer d'un recensement à l'autre et certains disparaissaient même avec la venue de nouveaux districts. En outre, les noms des endroits peuvent avoir changé. Ainsi, par exemple, on trouve bien clairement Ottawa pour la période 1861-1881, mais, en 1842, cette municipalité est mentionnée comme section du comté de Carleton, et, en 1851, elle apparaît sous le nom de Bytown. Il faut donc connaître l'histoire de la localité et savoir si elle a subi des changements de nom. La consultation d'un bon atlas ou de cartes historiques pourra faciliter les recherches.

In this catalogue, the microfilm reel numbers indicate where specific census returns can be found, but are not intended to imply that census returns for a particular district occupy the entire reel. Reels may contain census returns for more than one district and some districts may be found on more than one reel.

Names of Districts and Sub-Districts

Generally, present day appellations have been used and may sometimes differ slightly from those found on the original census forms. Entries have been standardized where possible, abbreviated words have been written out in full, and cross-references have been supplied.

Census Returns, 1666–1861

The first census in Canada was undertaken in 1666 by Intendant Jean Talon who listed 3,215 inhabitants. Talon is considered the "father" of modern census taking in Canada, for his work provided details of the basic resources and needs of the colonies and opened the way for future censuses to be taken on a regular basis. Prior to 1841, however, provision for the regular taking of a census was not made by statute in most of the provinces which were to form Canada at Confederation. Various efforts were made on an irregular basis, notably in Nova Scotia (1811, 1817, 1827 and 1838) and in Quebec (1825 and 1831). In Upper Canada, there was from 1793 (3 Geo. III, c.2) a series of statutes requiring the taking of a census on an annual basis, beginning with "a true and complete list of every male and female" resident in each district but later reverting to a nominal listing only for the heads of households. Such surviving listings, however, are few and scattered. By 1851, the pattern of decennial census taking had been established. However, not until Confederation in 1867 did the taking of the census become a constitutional requirement, and in 1871, the first Dominion census was conducted.

Users of the census will notice significant additions to the census returns for each successive census year. Although aggregate census returns are characteristic of the earliest years, some census returns as late as the 1840s are of this type, giving only statistics and no names. For many years the census returns are fragmentary, in that the surviving records do not cover all of a region or province. Most of the records prior to the 1840s identify only the head of the household by name, with few other details. From about 1825 onward, census returns for many areas not only name the head of the household but also indicate the number of persons living in each household, grouped by age and by sex, and their marital status.

Dans le catalogue, les numéros des bobines de microfilm renvoient aux recensements particuliers, ce qui ne signifie pas pour autant que les résultats d'un district particulier remplissent toute une bobine. Il se peut que les bobines renferment les résultats de plus d'un district et que certains districts soient répartis sur plus d'une bobine.

Noms des districts et des sous-districts

En général, on a utilisé les appellations modernes; elles peuvent différer quelque peu de celles figurant sur les formules de recensement originales. Les notices ont été normalisées dans la mesure du possible, les mots abrégés ont été écrits au long et des renvois ont été fournis.

Recensements dressés entre 1666 et 1861

L'intendant Jean Talon peut être considéré comme le "père" du recensement au Canada. En effet, on lui doit le premier recensement effectué en terre canadienne, en 1666 : il dénombra 3 215 habitants et dressa l'inventaire des ressources et des besoins fondamentaux de la colonie; c'est aussi à partir de cette date que les recensements ont commencé à être effectués à intervalles réguliers. Avant 1841 toutefois, dans la plupart des provinces qui allaient former le Canada en 1867, les recensements n'étaient pas prescrits par la loi. Divers efforts furent déployés irrégulièrement, notamment en Nouvelle-Écosse (1811, 1817, 1827 et 1838) et au Québec (1825 et 1831). À partir de 1793 le Haut-Canada établit une série de lois (3 Geo. III, c.2) rendant obligatoire le recensement annuel; au départ le recensement devait consister en une liste complète et exacte des habitants (hommes et femmes) de chaque district mais on en revint à une simple liste nominale des chefs de famille. Il subsiste peu de ces dénombrements et ils sont dispersés. En 1851 la pratique des recensements décennaux était déjà établie. Ce n'est qu'en 1867, année de la Confédération, que le recensement devint une exigence constitutionnelle. Le premier recensement du Dominion du Canada a eu lieu en 1871.

Chaque recensement comporte d'importants ajouts par rapport au précédent. Même si ce fut dans les premières années surtout qu'on se contenta de résultats globaux, on trouve jusque dans les années 1840 des recensements qui ne donnent aucun nom mais seulement des statistiques. Pour de nombreuses années on ne dispose que de résultats fragmentaires, qui ne couvrent pas une région ou une province en entier. La plupart des documents antérieurs à 1840 ne donnent guère de détails outre les noms des chefs de famille. À compter de 1825 environ, les recensements de nombreux secteurs indiquent non seulement les noms des chefs de famille, mais aussi le nombre de personnes par famille, groupées selon l'âge et le sexe, et leur état matrimonial.

With the passage of time, the questions increased in number and received more elaborate answers. Personal data may include place of birth, age, sex, marital status, infirmities, religion, education and occupation or profession. Residental data may include property ownership, type of housing and number of outbuildings. Agricultural and industrial data may include land occupied, implements, crops, livestock and their products, taverns, shops, distilleries, mills and manufactures, and wages paid. With few exceptions after 1851, all persons in each household were enumerated and an agricultural return was compiled separately.

In the 1861 census for Ontario and Quebec, the agricultural census returns appear at the end of the nominal census returns for the whole county. For example, the nominal census returns for Belleville, Ontario for 1861 are on Reel C-1032, but the agricultural census returns for the same town are found on Reel C-1034. Users of the 1861 film are encouraged to search the whole section on agriculture as census returns are not always found in one place for any given area.

Census of 1871

The most extensive and by far the most comprehensive census records in our custody are those for the year 1871. These records have been organized and filmed so that all nine schedules for each enumeration district are brought together as a unit. The nine schedules are as follows:

1. Nominal return of the living.
2. Nominal return of the deaths within the last twelve months.
3. Return of public institutions, real estate, vehicles and implements.
4. Return of cultivated land, of field products and of plants and fruits.
5. Live stock, animal products, home-made fabrics and furs.
6. Return of industrial establishments.
7. Return of products of the forest.
8. Return of shipping and fisheries.
9. Return of mineral products.

Users of the 1871 census records should be aware that it is possible to relate the information in schedules 3, 4, 5, 7, 8 and 9 directly to the nominal return (Schedule 1). In these six schedules, page and line references to the nominal census returns are located in the first column of each page, entitled "Reference to Schedule 1".

Avec le temps les questions, plus nombreuses, donnent lieu à des réponses plus détaillées. Les données personnelles peuvent comprendre le lieu de naissance, l'âge, le sexe, l'état matrimonial, les infirmités, la religion, le niveau d'instruction et le métier ou la profession. Parmi les données relatives aux résidences se trouvent le nom du propriétaire, le type de logement et le nombre d'annexes. Enfin les données agricoles et industrielles peuvent inclure la superficie des terrains, les instruments aratoires, les récoltes, le bétail et les produits de la ferme, les tavernes, les magasins, les distilleries, les moulins et les fabriques ainsi que les salaires. Après 1851, à quelques exceptions près, tous les membres de la famille sont dénombrés et un recensement agricole est dressé séparément.

Pour l'année 1861, en Ontario et au Québec, les données du recensement agricole figurent à la suite de celles du recensement nominal de tout le comté. À titre d'exemple, les résultats du recensement nominal de Belleville (Ontario) se trouvent sur la bobine C-1032, mais ceux du recensement agricole sont sur la bobine C-1034. Les chercheurs qui utilisent le film de 1861 sont invités à consulter toute la section sur l'agriculture parce que les résultats ne se trouvent pas toujours à un seul endroit pour un secteur donné.

Recensement de 1871

En matière de recensement, les dossiers les plus exhaustifs sont ceux de l'année 1871. Ils ont été disposés et microfilmés de façon à réunir les neuf tableaux d'énumération de chaque district, à savoir :

1. Dénombrement des vivants.
2. Dénombrement des morts des douze derniers mois.
3. Établissements publics, biens immobiliers, voitures et instruments aratoires.
4. Terres cultivées, produits des champs, plantes et fruits.
5. Bétail, produits d'origine animale, tissus confectionnés sur place et fourrures.
6. Établissements industriels.
7. Produits forestiers.
8. Navigation et pêcheries.
9. Produits minéraux.

Pour le recensement de 1871 il existe des renvois au tableau n° 1 pour les tableaux 3, 4, 5, 7, 8 et 9. Les renvois (page et ligne) sont inscrits dans la première colonne de chaque page, sous la rubrique "Renvoi au tableau n° 1".

Census of 1881

In 1881, the number of schedules was reduced to eight. They were as follows:

1. Nominal return of the living.
2. Nominal return of the deaths within the last twelve months.
3. Real estate, public institutions and industrial establishments.
4. Cultivated lands, field products, plants, fruits and other products.
5. Live stock, animal products and furs.
6. Products of the forest.
7. Shipping and fisheries.
8. Mineral products.

Only a microfilm copy of the nominal census returns (Schedule 1) has survived for 1881. There are no other schedules extant. Because the microfilm of the 1881 census, produced in the early 1950s and received by the Public Archives of Canada in 1979, is not of a consistent quality, not all images are decipherable. In 1881, Prince Edward Island was enumerated by Lot only. Entries for that year may be found under the appropriate Lot number.

Census of 1891

In 1891, the number of schedules was again nine. They were as follows:

1. Nominal return of the living.
2. Nominal return of the deaths within the last twelve months.
3. Real estate, orchard products, nurseries, vineyards and market gardens.
4. Return of farm products.
5. Return of live stock, animal products, home made fabrics and farm labour.
6. Industrial establishments.
7. Return of products of the forest.
8. Shipping and mining.
9. Fisheries.

Only a microfilm copy of the nominal census returns (Schedule 1) has survived for 1891. There are no other schedules extant. Because the microfilm of the 1891 census, produced in the early 1950s and received by the Public Archives of Canada in 1985, is not of a consistent quality, not all images are decipherable. In 1891, Prince Edward Island was enumerated by Lot only. Entries for that year may be found under the appropriate Lot number.

Recensement de 1881

En 1881, le nombre des tableaux passa à huit. Ils se présentaient comme suit :

1. Dénombrement des vivants.
2. Dénombrement des décès des douze derniers mois.
3. Biens immobiliers, établissements publics et industriels.
4. Terres cultivées, produits des champs, plantes, fruits et autres produits.
5. Bétail, produits d'origine animale et fourrures.
6. Produits forestiers.
7. Navigation et pêcheries.
8. Produits minéraux.

À l'exception d'une copie sur microfilm des résultats nominaux (tableau n° 1), il ne subsiste aucun tableau de ce recensement. Cette copie date du début des années 50 et a été confiée aux Archives publiques du Canada en 1979; sa qualité laisse parfois à désirer et, par conséquent, certaines images ne sont pas très claires. En 1881, l'Île-du-Prince-Édouard fut recensée par lots seulement. Les résultats doivent donc être consultés d'après les numéros des lots.

Recensement de 1891

En 1891 les tableaux, de nouveau au nombre de neuf, se présentaient comme suit :

1. Dénombrement des vivants.
2. Dénombrement des décès des douze derniers mois.
3. Biens immobiliers, produits des vergers, pépinières, vignobles et jardins maraîchers.
4. Produits agricoles.
5. Bétail, produits d'origine animale, tissus confectionnés à la maison et main-d'oeuvre agricole.
6. Établissements industriels.
7. Produits forestiers.
8. Navigation et mines.
9. Pêcheries.

À l'exception d'une copie sur microfilm des résultats nominaux (tableau n° 1), il ne subsiste aucun tableau de ce recensement. Cette copie date du début des années 50 et a été confiée aux Archives publiques du Canada en 1985; sa qualité laisse parfois à désirer et, par conséquent, certaines images ne sont pas très claires. En 1891, l'Île-du-Prince-Édouard fut recensée par lots seulement. Les résultats doivent donc être consultés d'après les numéros des lots.

Instructions to Enumerators

Copies of instructions to enumerators for the years 1871, 1881, and 1891 are available on microfiche through the interlibrary loan system from the National Library, Ottawa, Ontario, K1A 0N4.

Maps of Census Districts

Maps relating to the census districts for the years up to and including 1891 are not available. However, a description of the make-up of any census district may be obtained by consulting the published census reports.

Arrangement and Format of the Catalogue

Entries in this catalogue usually consist of two basic components, a sub-district and a district. A sub-district is entered in standard type, while a district is presented in bold-face upper case type. Names of districts and sub-districts are listed together in alphabetical order.

Entries for districts precede sub-districts of the same name, for example:

KENT

Kent **CARLETON**

A typical entry reads:

Beloeil **VERCHÈRES**

1831	C-723	
1851	C-1149	Agr. missing/manquant
1861	C-1329 - C-1330	
1871	C-10062	
1881	C-13204	
1891	T-6424	

The elements of the entry are explained below:

Beloeil	Name of sub-district (town or township).
VERCHÈRES	Name of district (city or county).
1851	A year for which there is a return.
C-1149	Microfilm reel number on which census returns are located.

Directives destinées aux recenseurs

Des copies des directives destinées aux recenseurs de 1871, 1881 et 1891 peuvent être obtenues sur microfiche par l'entremise du prêt entre bibliothèques. Les demandes doivent être adressées à la Bibliothèque nationale, Ottawa (Ontario), K1A 0N4.

Cartes des districts de recensement

Il n'existe aucune carte pour les districts du recensement de 1891 et des recensements antérieurs. Cependant on peut obtenir une description de la composition de n'importe quel district en consultant les rapports des recensements.

Classement et présentation du catalogue

Les entrées du catalogue comprennent généralement deux éléments principaux : un sous-district et un district. Les sous-districts sont inscrits en caractères ordinaires alors que les districts sont indiqués en lettres majuscules grasses. Les noms des districts et des sous-districts sont groupés dans une liste alphabétique.

Les notices des districts précèdent les sous-districts du même nom, par exemple :

KENT

Kent **CARLETON**

Voici un exemple typique de notice :

Beloeil **VERCHÈRES**

1831	C-723	
1851	C-1149	Agr. Missing/Manquant
1861	C-1329 - C-1330	
1871	C-10062	
1881	C-13204	
1891	T-6424	

Les différents éléments de cette notice sont expliqués ci-après :

Beloeil	Nom du sous-district (ville ou canton).
VERCHÈRES	Nom du district (cité ou comté).
1851	Année pour laquelle il existe un recensement.
C-1149	Numéro de la bobine de microfilm où l'on a enregistré les résultats du recensement.

For purposes of administration and ease of compilation during the census enumerations of 1871, 1881, and 1891, some sub-districts were divided into smaller units. Such divisions were indicated by an alpha-numeric code such as a-1, a-2, etc. In some instances, such as in larger urban areas, the division of sub-districts is quite extensive. Copies of shelf-lists indicating the order of filming on each reel and indicating the number of parts to various sub-districts are available for a fee. Please address any inquiries to to the following address:

Public Service Section,
Public Archives of Canada,
395 Wellington Street,
Ottawa, Ontario
K1A 0N3

Abbreviations Used in Census Enumeration

Over the years the Public Archives of Canada has received numerous enquiries about the abbreviations used in the census records. The following have been most frequently questioned:

"Religion" column:

B.C.	Bible Church
C. (of) E.	Church of England
C. (of) S.	Church of Scotland
E.M.C.	Episcopal Methodist Church
F.C.	Free Church (Presbyterian)
M.E.C.	Methodist Episcopal Church
P.C.L.P.	Presbyterian-Canada and Lower Provinces
P.F.C.	Presbyterian Free Church
R.P.	Reformed Presbyterian
U.P.	United Presbyterian
W.M.	Wesleyan Methodist

"Country or Province of Birth" column:

B.C.	Bas-Canada (Lower Canada, Québec) and British Columbia in 1881 and 1891
C.E.	Canada East (Canada-Est, Québec)
C.W.	Canada West (Canada-Ouest, Ontario)
H.C.	Haut-Canada (Upper Canada, Ontario)
L.C.	Lower Canada (Bas-Canada, Québec)
Man.	Manitoba
N.B.	New Brunswick (uncommon usage - North Britain, i.e. Scotland)
N.S.	Nova Scotia
Ont.	Ontario
P.E.I.	Prince Edward Island
Que.	Quebec
U.C.	Upper Canada (Haut-Canada, Ontario)

À des fins administratives et pour faciliter la compilation des recensements de 1871, 1881 et 1891, certains sous-districts furent divisés en unités plus petites. Ces divisions sont indiquées par un code alphanumérique tel que a-1, a-2, etc. Dans certains cas, par exemple s'il s'agit d'importants secteurs urbains, la division des sous-districts est assez considérable. On peut acheter des exemplaires de catalogues topographiques dans lesquels figure le contenu de chaque bobine de microfilm et le nombre de divisions des divers sous-districts. Pour toute demande de renseignements veuillez écrire à l'adresse suivante :

Section des services au public
Archives publiques du Canada
395, rue Wellington
Ottawa (Ontario)
K1A 0N3

Abréviations utilisées dans les dénombrements

Les Archives publiques du Canada ont reçu au cours des années nombre de questions relatives aux abréviations utilisées dans les recensements. Les demandes les plus fréquentes ont trait aux abréviations suivantes :

Colonne des "religions" :

B.C.	Bible Church
C. (of) E.	Church of England
C. (of) S.	Church of Scotland
E.M.C.	Episcopal Methodist Church
F.C.	Free Church (Presbyterian)
M.E.C.	Methodist Episcopalian Church
P.C.L.P.	Presbyterian-Canada and Lower Provinces
P.F.C.	Presbyterian Free Church
R.P.	Reformed Presbyterian
U.P.	United Presbyterian
W.M.	Wesleyan Methodist

Colonne des "pays ou des provinces d'origine" :

B.C.	Bas-Canada (Lower Canada, Québec) et British Columbia (Colombie-Britannique) en 1881
C.E.	Canada East (Canada-Est, Québec)
C.W.	Canada West (Canada-Ouest, Ontario)
H.C.	Haut-Canada (Upper Canada, Ontario)
L.C.	Lower Canada (Bas-Canada, Québec)
Man.	Manitoba
N.B.	Nouveau-Brunswick (New Brunswick) et parfois North Britain (i.e. l'Écosse)
N.S.	Nova Scotia (Nouvelle-Écosse)
Ont.	Ontario
P.E.I.	Prince Edward Island (Île-du-Prince-Édouard)
Qué.	Québec
U.C.	Upper Canada (Haut-Canada, Ontario)

Availability of Census Returns

Microfilm may be borrowed for use, three reels at a time, by any library or other institution which has a 35 mm microfilm reader and participates in the interlibrary loan arrangement. There is no charge for this service by the Public Archives of Canada, but the borrowing institution may have a surcharge to cover postage and handling. Requests for loans must be submitted by the borrowing institution on authorized interlibrary loan forms to the Public Service Section address given above. The standard loan period is one month, calculated from the date the film leaves the Public Archives of Canada.

The census returns listed in this catalogue are considered to be in the public domain and, as such, permission is not required to obtain reader-printer copies from the film for research purposes. Where a borrowing institution has no copying equipment, researchers should apply to the Public Service Section of the Public Archives of Canada at the address given above. A nominal charge is made for the production of photocopies, billed on completion of the order. Loan requests and duplication orders should be directed to the Public Service Section address given above.

Permission is not generally required for the publication of findings or excepts. We do ask that an appropriate source citation be used and that credit is given to the archives which has custody of the original records. For information regarding the archives having custody of the records appearing on reels coded other than C, H or T, inquiries should be directed to the Manuscript Division of the Public Archives of Canada.

Sale of Microfilm

With certain exceptions, the microfilm copies of most of the census returns listed in this catalogue are available for sale from the Public Archives of Canada. Inquiries as to the availability of microfilm and the price structure should be directed to the Public Service Section address given above.

Self-Service at the Public Archives of Canada

All census returns on microfilm are available in the self-service reading room of the Public Archives of Canada. The reading room is open seven days a week, including holidays. However, on their initial visit, researchers must register during regular office hours, 8:30 a.m. to 4:45 p.m., Monday through Friday.

Accès aux renseignements

Toute bibliothèque ou tout autre établissement possédant un lecteur de microfilm 35 mm et participant au prêt entre bibliothèques peut emprunter des microfilms, à raison de trois bobines à la fois. Les Archives publiques du Canada offrent ce service gratuitement mais l'établissement emprunteur peut avoir à payer des frais de port et de manutention. C'est lui qui doit soumettre les demandes de prêt, au moyen des formules autorisées, à la Section des services au public (adresse susmentionnée). La durée d'un prêt est habituellement d'un mois à partir de la date à laquelle le microfilm sort des Archives publiques du Canada.

Les résultats de recensements mentionnés dans ce catalogue sont considérés comme étant du domaine public et, de ce fait, aucune autorisation n'est requise pour obtenir des copies-papier d'un microfilm à des fins de recherche. Lorsque l'établissement emprunteur n'a pas de lecteur-reproducteur, les chercheurs doivent s'adresser à la Section des services au public des Archives publiques du Canada (adresse susmentionnée). Les frais modiques exigés sont facturés lors de l'exécution de la commande. Les demandes de prêts et de photocopies doivent être adressées à la Section des services au public (adresse susmentionnée).

En général il n'est pas nécessaire d'obtenir une autorisation avant de publier des résultats complets ou fragmentaires. Nous tenons toutefois à ce que la source soit citée correctement et à ce que la collaboration du service d'archives ayant la garde des originaux soit soulignée. Pour avoir des informations au sujet des établissements d'archives qui conservent les documents mentionnés sur les bobines portant un code autre que C, H ou T, il faut s'adresser à la Division des manuscrits des Archives publiques du Canada.

Vente de microfilms

À quelques exceptions près, les microfilms des recensements figurant dans ce catalogue sont en vente aux Archives publiques du Canada. On peut se renseigner sur les microfilms offerts et leur prix à la Section des services au public (adresse susmentionnée).

Libre-service aux Archives publiques du Canada

Les recensements qui ont été reproduits sur microfilm sont conservés dans la salle de lecture libre-service des Archives publiques du Canada. Cette salle est ouverte 24 heures sur 24, sept jours par semaine, y compris les jours fériés. Cependant, à leur première visite, les chercheurs doivent s'inscrire pendant les heures normales de service, soit du lundi au vendredi, entre 8 h 30 et 16 h 45.

Finding Aid 300

This catalogue does not include a large number of fragmentary census returns, lists of householders or residents of small localities and other documents which complement the main census returns. Since most of these items cannot be readily located within a specific microfilm reel, it is necessary for a researcher to use a guide before consulting the film. Finding Aid 300 provides the necessary guidance, in the form of specific volume and page or other references. This finding aid can be photocopied for a fee and is also available on microfiche. Inquiries concerning Finding Aid 300 should be directed to the Public Service Section address given above.

Microfilms Held Elsewhere

Many regional library systems have acquired copies of the census returns for the townships and counties of their region. In such cases, researchers may find that microfilm loans can be more rapidly handled locally, especially if local genealogical societies have produced nominal indexes to those census returns.

The Genealogical Society of Utah has also acquired copies of some census returns and makes them available for loan through the branch library system under the auspices of the church of Jesus Christ of Latter Day Saints (the Mormons).

Please note that other repositories may use identification codes of their own for their microfilm copies of Public Archives of Canada holdings. Requests for loans from the Public Archives of Canada **must quote** the Public Archives of Canada reel numbers given in Finding Aid 300 or in this catalogue.

Indexing of Census Returns

There is no single, consolidated index for the census returns of any particular year, although there may be such indexes for the returns of individual provinces. Various local efforts are currently being made, with greater or lesser degrees of success, to index the whole of the census returns for a particular county, district or province, for a single year or several census years. Many completed index projects have been published, often under the auspices of local genealogical societies, and can be traced with the help of librarians. Others, often in card format, have been deposted in provincial or municipal institutions: archives, libraries or museums. Only a very few have been put on microfilm or microfiche. Most indexing projects have not been publicized outside of the geographic locality which they cover.

Instrument de recherche 300

Ce catalogue ne fait pas état de bon nombre de résultats fragmentaires, ni des dénombrements des chefs de famille ou des résidants de petites localités, sans parler des diverses informations qui viennent souvent compléter le recensement principal. La plupart de ces informations étant difficiles à repérer sur une bobine de microfilm, le chercheur devra consulter l'instrument de recherche 300; il y trouvera le volume et la page, ainsi que d'autres renseignements pertinents. Cet instrument de recherche peut être xérographié moyennant paiement; il existe aussi sur microfiche. On peut obtenir de plus amples informations à la Section des services au public (adresse susmentionnée).

Microfilms gardés dans d'autres établissements

Beaucoup de bibliothèques régionales ont acquis des copies des recensements des cantons et comtés de leur région. Dans ces cas, il peut être plus rapide d'emprunter des microfilms directement à ces établissements, surtout si des sociétés généalogiques locales ont produit des index nominaux.

La Genealogical Society of Utah a elle aussi acquis des copies de certains recensements qu'elle prête par l'entremise de ses succursales de bibliothèque, sous les auspices de l'Église de Jésus-Christ des saints du dernier jour (les Mormons).

Veuillez noter que les services d'archives peuvent se servir de leurs propres codes pour identifier leurs microfilms de documents conservés aux Archives publiques du Canada. Lorsqu'on désire emprunter des microfilms à ces dernières, il **faut indiquer** les numéros de bobine mentionnés dans l'instrument de recherche 300 ou dans ce catalogue.

Indexation des données de recensement

Il n'existe pas d'index général pour les résultats des recensements de telle ou telle année; toutefois on peut trouver ce genre d'index pour les données de recensements d'une province en particulier. À l'heure actuelle on tente au niveau local, avec quelques succès, d'indexer l'ensemble des données de recensement de tel comté, district ou province, pour une ou plusieurs années. De nombreux index ont été publiés déjà, souvent sous les auspices de sociétés généalogiques locales, et on peut les retrouver avec l'aide de bibliothécaires. D'autres, souvent sur fiches, ont été déposés dans des établissements provinciaux ou municipaux : services d'archives, bibliothèques ou musées. Très peu d'entre eux ont été microfilmés ou enregistrés sur microfiches. La plupart du temps l'existence de ces index n'est connue que dans la localité concernée.

The Public Archives of Canada is not routinely informed of census indexing projects and cannot provide a definitive listing of them.

Most indexing projects are carried out by volunteers and each project has its own set of criteria for the verification of data, cross-referencing of semi-legible names and resolving of like problems. Introductory notes may be included to explain the headings of the columns in a census schedule or the vagaries of the enumerators.

One of the better examples of such explanations is the introduction to the microfiche index for the 1848-1850 census of Canada West (Ontario) produced by Index Publishing of Salt Lake City, Utah.

Users of the census records may find additional benefit in consulting complementary sources found in the holdings of the Public Archives of Canada. Such sources are: Manuscript Group (MG) 8, Records of New France and Quebec (17th to 20th centuries); MG 9, Provincial, Local and Territorial Records; Record Group (RG) 3, Post Office; RG 9, Militia and Defence; RG 10, Indian Affairs; RG 11, Public Works; RG 12, Transport; RG 15, Interior; RG 17, Agriculture; RG 18, Royal Canadian Mounted Police; RG 24, National Defence; RG 32, Public Service Commission; RG 38, Veterans Affairs; and RG 76, Immigration Branch. Some of the material found in the above sources is available on microfilm and may be borrowed on interlibrary loan; however, most of the material has not been filmed and may only be consulted upon a personal visit to the Public Archives of Canada.

The assistance of Janine Roy, Lorraine St-Louis, and Daniel Somers, and in particular Patricia Kennedy, in the preparation of this catalogue is gratefully acknowledged.

Thomas A. Hillman
Government Archives Division

Les Archives publiques du Canada ne sont pas systématiquement informées des projets d'indexation de recensements et ne peuvent donc en fournir une liste exhaustive.

La plupart des projets d'indexation sont menés par des bénévoles, et chaque projet a ses critères pour vérifier les données, établir les renvois aux noms difficiles à lire, et résoudre d'autres problèmes du même genre. Des notes préliminaires sont parfois ajoutées pour expliquer les titres des colonnes des tableaux de recensement ou les fantaisies des recenseurs.

L'un des meilleurs exemples de ce genre d'explications se trouve dans l'introduction à l'index sur microfiches pour le recensement de 1848-1850 du Canada-Ouest (Ontario) produit par Index Publishing, de Salt Lake City (Utah).

Les chercheurs auront intérêt à consulter les sources complémentaires qui se trouvent dans les fonds des Archives publiques du Canada. Il s'agit du groupe de manuscrits (MG) 8, Documents relatifs à la Nouvelle-France et au Québec (XVII^{e} au XX^{e} siècles); du MG 9, Documents relatifs aux provinces, aux territoires et aux municipalités; du groupe d'archives (RG) 3, Postes; du RG 9, Milice et Défense; du RG 10, Affaires indiennes; du RG 11, Travaux publics; du RG 12, Transports; du RG 15, Intérieur; du RG 17, Agriculture; du RG 18, Gendarmerie royale du Canada; du RG 24, Défense nationale; du RG 32, Commission de la fonction publique; du RG 38, Affaires des anciens combattants; et du RG 76, Direction de l'immigration. Certains de ces documents ont été microfilmés et peuvent être empruntés par l'entremise du prêt entre bibliothèques; cependant, la plupart d'entre eux n'ont pas été microfilmés et ne peuvent être consultés qu'aux Archives publiques du Canada.

Nous tenons à remercier Janine Roy, Lorraine St-Louis, Daniel Somers, et tout particulièrement Patricia Kennedy, qui ont collaboré à la préparation de ce catalogue.

APPENDIX

ANNEXE

APPENDIX/ANNEXE

CENSUS RECORDS AVAILABLE ON MICROFILM/RECENSEMENTS DISPONIBLES SUR MICROFILM

Only microfilmed records are available for research purposes.

The original paper record exists at the Public Archives of Canada for all microfilmed records listed below with a "C" or "H" prefix, except for the year 1881. The original records for the years 1881 and 1891 no longer exist; the microfilm reels for these years are prefixed with a "C" and "T" respectively. The original records for all microfilm reels prefixed with an "F" or "M" do not exist at the Public Archives of Canada but rather in other institutions.

Symbol "N" denotes nominal returns listing all members of households.

Symbol "HF" denotes returns listing heads of families only.

Seuls les microfilms sont mis à la disposition des chercheurs.

Les Archives publiques du Canada possèdent les originaux des microfilms précédés de la lettre "C" ou "H", excepté pour 1881. Les originaux pour 1881 et 1891 n'existent plus, et les microfilms de ces années sont précédés des lettres "C" et "T" respectivement. Les originaux des bobines précédées des lettres "F" ou "M" se trouvent dans d'autres établissements.

Le symbole "N" désigne un dénombrement incluant tous les membres d'un ménage.

Le symbole "HF" désigne un dénombrement des chefs de famille seulement.
